JJHAM Business Portal — System Documentation (Full ERP)

Prepared by: Dave Landicho | Arhizza Hernandez

Date: October 07, 2026

1. Overview and scope

The JJHAM Business Portal is JJHAM Recruitment Agency's enterprise system (ERP): one database and one record per person, with role-based portals, from registration through recruitment, deployment to the UAE, welfare monitoring and contract completion.

Release 1 covers the recruitment-to-deployment workflow: medical exam, employer documents, offer letter and contract signing, payment, visa, RFP and exit clearance, flight, and post-deployment status. It includes the Applicant Portal (what applicants see) and the staff back-office.

Later releases follow the V1 Master Blueprint phases on the same database: agents and commissions, employee portal (attendance, leave, payroll), inventory and purchasing, finance, OFW welfare and case management, contract monitoring, and the executive dashboard. Sections 2–10 specify Release 1; sections 11–20 specify the later modules; sections 21–24 cover architecture, technology, the full roadmap and open items.

Objectives

One record per person, from registration to contract completion.

Every document, signature, payment and status change is stored, attributed and timestamped.

Applicants see their own status, required documents, signing tasks, payment instructions and flight details.

Each role sees and does only what its work needs (least privilege).

Management can see where every applicant is and how long they have been in each stage.

Terms used

Term	Meaning
Applicant Portal	The screens applicants and deployed workers log into

Application	One applicant's case for one job order; an applicant can have several
MOHRE contract	UAE Ministry of Human Resources and Emiratisation employment contract
POEA-standard contract	Philippine standard employment contract verified by the Migrant Workers Office (MWO)
RFP	Request for Processing, submitted to the DMW
Exit clearance	Printed OEC (Overseas Employment Certificate) or DMW OFW Pass
AWOL	Worker reported absent without leave from the employer in the UAE
DMW	Department of Migrant Workers (formerly POEA)

2. User roles and permissions

Role names follow the V1 Blueprint and are editable labels. Permissions are enforced on the server, not by hiding buttons.

Role	Login	Responsibilities in Release 1
Management/Admin	Yes (2FA)	Users and roles, system settings, fee settings, payment QR/account, reports, audit log
Management (view)	Yes (2FA)	Read-only oversight, dashboards, reports, audit log
Recruitment Staff	Yes (2FA)	Sends the employer document packet; encodes employer responses with evidence; issues offer letter and contracts for e-signature
Documentation Staff	Yes (2FA)	Encodes and verifies clinic results; visa record; prepares RFP and exit clearance; sends documents to applicants
Role	Login	Responsibilities in Release 1

Deployment Staff	Yes (2FA)	Verifies payment receipts; ticket, flight and arrival; post-deployment status including AWOL
Finance	Yes (2FA)	Reviews verified payments, records official receipt/invoice numbers, handles refunds, monthly reconciliation
Applicant / Worker	Yes (OTP)	Own record only
Clinic	No	External. Results arrive by clinic email, clinic portal, or through the applicant; staff encode them
Employer (UAE)	No	External. Communicates mainly by WhatsApp/Viber; staff encode responses with evidence

Roles added in later releases

Role	Release	Responsibilities
Agent	2	Own assigned applicants only: notes, follow-ups, progress; no passport or medical files
Employee (every staff member)	3	Own profile, attendance, leave, payslips, assets, announcements
Supervisor	3	Approves leave and attendance corrections for their team
HR/Admin	3–4	Employee records, attendance, leave, payroll, bonuses
Inventory/Purchasing	5	Stock, assets, purchase requests and orders, suppliers
Finance	6 (expanded)	Income, expenses, receivables, payables, reports
Welfare Staff	7	Welfare checks, cases, contract monitoring

A person can hold more than one role (e.g., Deployment Staff + Employee); permissions add up.

Permission matrix — V = view, C = create, E = edit, A = approve/verify, R = review, — = none, "own" = applicant's own record.

Feature	Mgmt/Admin	Mgmt (view)	Recruitment	Documentation	Deployment	Finance	Applicant
Users and roles	V C E	V	—	—	—	—	—
Payment QR / account	V C E (logged, owner alerted)	V	—	—	V	V	V (active only)
Fee settings	V C E	V	V	—	V	V	V (own)
Applicant profile	V	V	V E	V E	V	—	V E (own, until locked)
Passport, ID and photo files	V	—	V C (on behalf)	V C (on behalf)	V	—	V C (own)
Medical result and certificate	V	V	V	V C E A	—	—	V (own: Fit / Not yet cleared)
Employer packet and responses	V	V	V C E	V	—	—	—
Offer letter and contracts	V	V	V C E	V	—	—	V (own)
E-signature	—	V	V	V	—	—	C (own)
Receipt upload	—	V	—	—	V C (on behalf)	V	C (own)
Payment verification	V	V	—	—	A	R	V (own status)
Refunds	V A	V	—	—	V	C E	V (own)
Visa	V	V	V	V C E	V	—	V (own)
RFP and exit clearance	V	V	V	V C E	V	—	V (own)
Ticket and flight	V	V	V	V	V C E	—	V (own)
Postdeployment status / AWOL	V	V	V	V	V C E	—	V (own, no internal remarks)
Reports and dashboards	V	V	V (own pipeline)	V (own pipeline)	V (own pipeline)	V (payments)	—
Audit log	V	V	—	—	—	—	—

Rules

No role, including Admin, can delete a document version, signature, payment, status history entry or audit log entry. Corrections are new, logged entries.

Staff can only open sensitive files (passport, ID, medical) when their role needs them; every opening is logged.

Applicants can edit their profile until Documentation Staff locks it for processing; later changes go through staff. Passport numbers show only the last 4 characters in lists, imports and search results; the full number is shown on request to roles that need it, and each view is logged. Only Admin can skip a stage; a reason is required, logged, and sent to Management. Staff can upload documents and receipts on an applicant's behalf (section 4.7) but can never sign for them.

3. Workflow and status flow

Each application moves through the statuses below. Payment has its own sub-status (section 5). After departure, flight status and employment status are tracked separately. Every change is written to the status history with user, time and remarks.

Main sequence

1. Registration and document checklist
2. Medical exam (before employer selection)
3. Employer document packet: passport scan, 2x2 photo, medical certificate
4. Offer letter released by employer → applicant e-signs
5. MOHRE contract issued → applicant signs; POEA-standard contract verified by MWO
6. Placement fee payment and receipt verification (per the fee rule for the job order) 7. Visa release
8. RFP to DMW → exit clearance (OEC or OFW Pass)
9. Ticket from employer → departure → arrival
10. Post-deployment monitoring

```
flowchart TD
    A[Registered] --> B{Checklist complete?}
    B -- No --> B1[Documents Incomplete] --> B
  B -- Yes --> C[For Medical]
  C --> D{Verified clinic result}
  D -- Unfit --> D1{Re-exam?}
    D1 -- Yes --> C
    D1 -- No --> X1[Failed Medical - closed]
```

```
D -- Fit --> E[Sent to Employer]
E --> F[Awaiting Offer]
F
-- Employer cancels --> X2[Employer Cancelled - closed]
F -- Offer released --> G[Offer for Signature]
G -- Declined / not signed --> G1{Staff decide}
  G1 --> X3[Offer Declined - closed]
  G1 --> H0[On Hold]
G -- Signed --> H[Contract Processing]
H --> I{Fee applies?}
I -- Yes --> J[Payment Due]
J --> J1{Receipt verified?}
  J1 -- Rejected --> J
  J1 -- Verified --> K[Visa Processing]
  I -- No --> K
K
-- Denied --> X4[Visa Denied - closed, refund check]
K -- Released --> L[RFP Submitted]
L --> M[Exit Clearance Issued]
M --> N[Ready for Deployment]
N --> O[Departed]
O --> P[Arrived]
P --> Q{Employment status}
Q --> Q1[Working]
  Q --> Q2[Resigned]
  Q --> Q3[AWOL]
  Q --> Q4[Contract ended / Repatriated / Terminated]
```

Withdrawn, Employer Cancelled and On Hold can be reached from any open status (left off the chart for readability).

Status flow table

Current status	Trigger	Who acts	Next status	Notification
—	Account created and linked to a job order	Recruitment Staff / Applicant	Registered	Applicant: welcome + checklist

Registered	Checklist complete and checked	Documentation Staff	For Medical	Applicant: medical schedule
Registered	Checklist incomplete after deadline	System	Documents Incomplete	Applicant: missing items; staff

Current status	Trigger	Who acts	Next status	Notification
For Medical	Verified result: Fit	Documentation Staff	Medical Fit	Applicant; Recruitment Staff
For Medical	Verified result: Unfit or Pending	Documentation Staff	Medical Unfit / Medical Pending	Applicant (neutral wording); Recruitment Staff
Medical Unfit	Re-exam allowed	Documentation Staff	For Medical	Applicant
Medical Unfit	No re-exam	Documentation Staff	Failed Medical (closed)	Applicant; Management
Medical Fit	Packet sent to employer	Recruitment Staff	Sent to Employer	Applicant
Sent to Employer	Employer acknowledges (evidence attached)	Recruitment Staff	Awaiting Offer	—
Awaiting Offer	Offer letter released	Recruitment Staff	Offer for Signature	Applicant: sign request
Offer for Signature	Applicant signs	Applicant	Offer Signed	Recruitment Staff

Offer for Signature	Applicant declines or misses deadline after reminders	Recruitment Staff (case by case)	Offer Declined (closed) or On Hold	Management
Offer Signed	MOHRE contract issued	Recruitment Staff	Contract for Signature	Applicant: sign request
Contract for Signature	Applicant signs	Applicant	Contract Signed	Recruitment Staff; Deployment Staff

Current status	Trigger	Who acts	Next status	Notification
Contract Signed	POEA-standard contract sent for MWO verification	Recruitment Staff	Contract Verification	—
Contract Verification	MWO verification received	Recruitment Staff	Contract Verified	Applicant
Contract Verified	Fee rule applies to the job order	System	Payment Due	Applicant: amount + QR/account
Contract Verified	No fee applies	System	Visa Processing	Applicant
Payment Due	Payment verified	Deployment Staff	Visa Processing	Applicant: payment confirmed
Visa Processing	Visa released (copy uploaded)	Documentation Staff	Visa Released	Applicant

Visa Processing	Visa denied	Documentation Staff	Visa Denied (closed)	Applicant; Finance (refund check); Management
Visa Released	RFP submitted	Documentation Staff	RFP Submitted	—
RFP Submitted	OEC or OFW Pass issued	Documentation Staff	Exit Clearance Issued	Applicant: documents ready
Exit Clearance Issued	Ticket received from employer	Deployment Staff	Ready for Deployment	Applicant: flight details
Ready for Deployment	Departure confirmed	Deployment Staff	Departed	Management
Current status	Trigger	Who acts	Next status	Notification
Departed	Touchdown confirmed	Deployment Staff	Arrived	Management
Arrived	Employment update	Deployment Staff	Working / Resigned / AWOL / Contract ended / Repatriated / Terminated	Management; worker
Any open status	Applicant withdraws	Recruitment Staff	Withdrawn (closed)	Finance (refund check); Management
Any open status	Employer cancels	Recruitment Staff	Employer Cancelled (closed)	Applicant; Finance (refund check)

Any open status	Paused, reason required	Assigned staff	On Hold	Management

The order of MOHRE signing and MWO verification, and which contract the applicant esigns, is to be confirmed (section 24). Both are configurable.

4. Module specifications

4.0 Site structure and entry points

One Laravel application serves three areas. Filament owns only the staff panel's address; the site root is a normal Laravel page.

Address	What it is	Built with	Who uses it
`jjham.ph/`	Public landing page	Blade	Everyone
`jjham.ph/login` , `/register`	Applicant login and sign-up (password + OTP)	Livewire	Applicants
Address	What it is	Built with	Who uses it
`jjham.ph/portal`	Applicant Portal: Home, Documents, Payments, Profile	Livewire	Logged-in applicants
`staff.jjham.ph`	Staff back-office with its own login and 2FA	Filament	Staff only

Landing page (`/`)

Agency name, logo and a one-line description.

DMW license number and validity, so applicants can confirm JJHAM is licensed. Confirm display requirements with the compliance officer.

Two buttons: Applicant login and Register.

Optional: open UAE job orders, office address and contact numbers, privacy notice, FAQs.

No staff login link; staff use their own bookmarked address.

Until the landing page is ready, `/` redirects to the applicant login.

Staff address

Staff use the subdomain `staff.jjham.ph` , so applicant and staff sessions never mix and staff access can later be limited to office IP addresses or a VPN.

`jjham.ph/staff` is an acceptable alternative. Avoid `/admin` : most staff are not admins, and it is the first path attackers try.

After login

Applicants land on `/portal` Home, showing their current stage and next action. Staff land on the staff dashboard, which shows the menu, cards and queues for their role.

Setup in code

```
// app/Providers/Filament/StaffPanelProvider.php
$panel->id('staff')
    ->domain('staff.jjham.ph')   // or ->path('staff')
    ->login()
    ->authGuard('web');          // staff guard, 2FA on

// routes/web.php
Route::view('/', 'landing');                                    // public
page Route::middleware('guest:applicant')->group(fn () => /* login,
register */
null);
Route::middleware('auth:applicant')->prefix('portal')->group(fn () => /*
portal pages */ null);
```

4.1 Applicant Portal

Mobile-first web app for applicants and deployed workers.

Registration and identity: sign-up with mobile and email, each confirmed by one-time code (OTP); passport name must match the profile; duplicate check by passport number, mobile and email.

Account recovery: self-service password reset by OTP; staff can unlock an account after checking identity, which is logged.

Dashboard: current status, progress bar, next action, deadlines.

Checklist: required documents for the applicant's job order, with status (Pending, Verified, Rejected with reason, Expired) and re-upload.

Signing tasks: read and e-sign documents marked for applicant signature.

Payment: amount due, active QR/account, receipt upload, payment status.

Travel: visa, exit clearance, ticket and flight details.

Post-deployment: employment status as recorded (e.g., Working, AWOL – reported [date]), without internal remarks.

Messages: notifications from staff.

Applicants cannot see staff notes, other applicants, or raw employer correspondence.

4.2 Document management

Each job order has a **checklist template**; checklists differ per employer / job order. Each document records type, version, upload date, uploader, expiry date and verification status: Pending, Verified, Rejected (reason required), Expired.

A re-upload creates a new version; older versions are kept, never overwritten.

File rules: JPG, PNG or PDF; maximum 10 MB (receipts 5 MB); 2x2 photo at least 600×600 px; real file type checked on the server; malware scan before the file becomes available.

Expiry tracking: passport (minimum validity at departure — confirm current rule), medical certificate, visa and exit clearance, with alerts before expiry.

4.3 Medical

The medical exam happens before employer selection.

Documentation Staff records clinic, exam date, result (Fit / Unfit / Pending), certificate, validity end date and **source** (clinic email, clinic portal, or brought by the applicant).

Results brought by the applicant stay **Unverified** until Documentation Staff confirms with the clinic. Only verified results move the application forward.

Because employer selection can take time, the system warns staff when a medical certificate will expire before expected deployment.

Applicants see only Fit / Not yet cleared, never diagnoses.

4.4 Employer communication

The employer has no login. Recruitment Staff sends the document packet and encodes every employer response (acknowledgement, offer letter, cancellation, ticket). Each response records channel (mostly WhatsApp/Viber), date received, sender name and number, and an attached screenshot or file as evidence.

Recommended: one agency-owned WhatsApp Business number, so evidence does not stay on staff personal phones.

4.5 E-signature

Any document type can be set to "requires applicant e-signature" (offer letter, MOHRE contract, POEA-standard contract, others).

Signing flow: applicant opens the document → enters OTP → ticks "I have read and agree" → chooses to draw a signature or upload an e-signature (a signature image or a scanned signed page). Uploaded signatures are checked by staff against the applicant's ID. The OTP is required either way.

Evidence stored: signer identity, OTP confirmation, date and time (PH time and UTC), IP address, device, the exact consent text.

The system adds a signature page to the PDF, computes a SHA-256 fingerprint, and stores the signed copy as read-only. Any later change to the file is detectable. A document type can instead be set to "requires wet signature", where the applicant acknowledges online and staff upload the signed paper copy.

4.6 Deployment and post-deployment

Deployment Staff records ticket, airline, flight number, departure and arrival airports and times, departure confirmation and touchdown confirmation.

After arrival, employment status is one of: Working, Resigned, AWOL, Repatriated, Contract ended, Terminated (names may change once verified).

AWOL / resignation case record: effective date, source of report (employer, MWO, family, worker), remarks, optional evidence file, encoded by, and who was notified. Only Deployment Staff can set AWOL.

The worker's portal shows the real status ("AWOL – reported [date]") without internal remarks. A wrong report is corrected with a new logged entry; the original is never deleted.

4.7 Assisted mode (staff help for applicants who are not tech-savvy)

Staff can do most portal tasks for an applicant who visits the office or sends files by Messenger, Viber or WhatsApp. Everything done on their behalf is labelled, logged and visible to the applicant.

Task	Staff who can do it for the applicant	How it is recorded
Create the account	Recruitment Staff	Registered with mobile number only (email optional); applicant sets their own password by OTP, or staff hands over a one-time login code
Privacy consent	Recruitment Staff	Applicant ticks consent on a staff tablet, or signs the paper consent form, which is scanned and uploaded

Task	Staff who can do it for the applicant	How it is recorded
Upload checklist documents (passport, ID, 2x2 photo, certificates)	Recruitment Staff, Documentation Staff	Marked "Uploaded by staff on behalf of applicant" with staff name, date and source (walk-in, Messenger, Viber, WhatsApp, email)
Upload a payment receipt	Deployment Staff	Same label; source recorded
Record a cash or office payment	Deployment Staff	"Record office payment" with amount, date and the agency's receipt/invoice number; Finance reviews
Update contact details	Recruitment Staff	Change logged; applicant notified at the old and new number

Rules

The same file rules and quality checks apply as for applicant uploads.

Recommended: a document or receipt uploaded by one staff member is verified by a different staff member. Admin can relax this for a small team; it stays logged either way.

The applicant gets an SMS or email when something is uploaded or recorded for them, so they can report a mistake.

Staff never sign for the applicant. For signing, the applicant either (a) signs on a staff tablet or phone at the office, entering the OTP sent to their own mobile, or (b) signs on paper, and staff upload the signed copy for document types allowed a wet signature.

Staff upload on a work device, not a personal phone. Files received by Messenger, Viber or WhatsApp are deleted from the chat app after upload.

Applicants keep full access: they can view everything uploaded for them and take over the portal themselves at any time.

5. Payment module

Placement fees follow the agency's agreement with each applicant and are set per job order through fee rules: the most specific rule wins (job order, then category, then default). Domestic

workers are not charged. Amounts and no-fee categories should match DMW rules (section 24).

Payment channels (Management/Admin)

Admin uploads the QR image and/or bank or e-wallet name, account name and account number.

Only one channel set is active at a time.

Every change is logged with the old and new values, and the owner receives an email alert.

Applicants with a pending payment are notified when payment details change. Second-person approval of changes is an optional setting, off for now.

Fee settings (Management/Admin)

Set as rules (job order, then category, then default): total fee, allowed down-payment amounts (e.g., ₱10,000 or ₱5,000), balance rule, installments, due dates, and a note on the legal basis.

The amounts are copied onto each application when payment starts, so later setting changes don't alter existing cases.

Applicant steps

1. At Payment Due, the applicant sees the amount, due date and active QR/account.
2. The applicant pays outside the system.
3. The applicant uploads the receipt and enters amount, date paid, channel and reference number.

Verification

Deployment Staff compares the receipt with the bank or e-wallet statement and marks it Verified or Rejected (reason required).

Duplicate detection: the system flags a reference number, or an identical image, that was already used, and amounts or dates that don't match.

On verification, the number of the agency's BIR-registered official receipt or invoice is recorded. The system records it; it does not generate it.

Finance reviews verified payments and reconciles them monthly.

Payment statuses

Status	Meaning	Set by	Next

Pending	Payment due, nothing uploaded	System	Submitted
Submitted	Receipt uploaded, waiting for review	Applicant	Verified or Rejected
Verified	Matches statement; receipt/invoice number recorded	Deployment Staff	Partially Paid or Paid in Full
Rejected	Mismatch, unreadable, duplicate or wrong amount; reason required	Deployment Staff	Pending (applicant reuploads)
Partially Paid	Down payment verified, balance remaining	System	Pending (balance)
Paid in Full	Total fee verified	System	—
Refund Requested	Case closed with refund due (visa denied, employer cancelled, withdrawn, as rules allow)	Finance	Refunded
Refunded	Refund paid; amount, date and approver recorded	Finance, approved by Management/Admin	—

6. Data fields and documents per stage

Stage	Data fields	Documents	Encoded by
Registration	Name, birthdate, sex, civil status, nationality, address, mobile, WhatsApp, email, emergency contact, position, job order, source / referred by	Privacy consent (accepted online)	Applicant / Recruitment Staff

Profile	Passport number, issue and expiry date, place of issue; height, weight; experience	Passport bio page, 2x2 photo (white background), valid ID, other checklist items per job order	Applicant
Medical	Clinic, exam date, result, validity end date, source, verified by	Medical certificate	Documentation Staff
Employer packet	Date sent, channel, employer contact, acknowledgement date	Passport scan, 2x2 photo, medical certificate, employer acknowledgement (screenshot/file)	Recruitment Staff
Offer letter	Date released, position, salary, signing deadline	Offer letter (unsigned and signed), signature evidence	Recruitment Staff / Applicant
Contracts	MOHRE contract number and date; POEA-standard contract MWO verification date and status	Both contracts (unsigned and signed), MWO verification proof	Recruitment Staff / Applicant
Stage	Data fields	Documents	Encoded by
Payment	Amount due, amount paid, date, channel, reference number, receipt/invoice number, verified by, reviewed by	Payment receipt; official receipt or invoice copy	Applicant / Deployment Staff / Finance
Visa	Visa or entry permit number, issue and expiry date, status	Visa copy	Documentation Staff

RFP and exit clearance	RFP reference and submission date; exit clearance type (printed OEC or OFW Pass), number, issue date, validity	RFP confirmation; OEC copy (required) or OFW Pass (optional)	Documentation Staff
Flight	Ticket number, airline, flight number, origin, destination, departure and arrival date/time, confirmations	E-ticket	Deployment Staff
Postdeployment	Employment status, effective date, source, remarks, encoded by, notified	Supporting evidence (optional)	Deployment Staff
Closure	Closed status, reason, date, refund due	Supporting evidence (optional)	Assigned staff

7. Notifications, reminders and escalation

Email and in-app notifications are in the first go-live; SMS follows shortly after. SMS messages are short and never include passport numbers, amounts or medical details; they point the applicant to the portal.

Event	In-app	Email	SMS
Account created / checklist issued	Applicant	Applicant	—
Document rejected (with reason)	Applicant	Applicant	Applicant
Medical schedule / result	Applicant, staff	Applicant	Applicant (schedule only)
Document ready to sign	Applicant	Applicant	Applicant

Signing deadline reminder (48 h and 24 h before)	Applicant	Applicant	Applicant
Document signed	Staff	Applicant (copy)	—
Payment due / due-date reminder	Applicant	Applicant	Applicant
Receipt verified / rejected	Applicant	Applicant	Applicant (rejected only)
Payment details changed	Applicant (if payment pending)	Applicant; owner	Applicant
Visa released / denied	Applicant, staff	Applicant	Applicant
Exit clearance issued, flight details	Applicant	Applicant	Applicant
Document expiring (passport, medical, visa, exit clearance)	Staff, applicant	Applicant	—
Employment status changed	Worker, Management	Management	—

Escalation for stuck applications

Each status has a time limit, set by Admin (example: 3 days in Payment Submitted).

When the limit passes, the assigned staff member is notified.

If still unresolved after a second limit (example: 7 days), Management is notified.

A daily "stuck applications" list is shown on the dashboard.

8. Security, data privacy and compliance

Audit trail

Every create, edit, status change, verification, signature, payment action, login and sensitive-file download is logged with user, date and time, IP address, and before/after values.

The log is append-only: no one can edit or delete it.

Data privacy (Data Privacy Act, RA 10173)

Privacy notice and consent accepted at registration, with the version and date stored. The agency names a Data Protection Officer and checks NPC registration requirements.

Passport numbers, ID numbers and medical remarks are encrypted in the database; passport, ID and medical files are encrypted in storage.

Sensitive files open only through the system, which checks permission, logs the access and gives a link that expires after 5 minutes.

Data retention

Closed records are kept for a set period (proposed: 5 years after contract end; rejected or withdrawn applicants possibly shorter). The exact periods are to be confirmed with counsel and DMW record-keeping rules.

After the period, a monthly job deletes files and anonymises the record, keeping only statistics. Every deletion is logged.

Records under dispute can be put on legal hold, which blocks deletion.

Access security

Two-factor authentication for all staff; OTP for applicants at registration, signing and password reset.

Staff sessions end after 30 minutes idle (applicants after 60); an alert is sent on login from a new device.

Login and OTP attempts are rate-limited; CAPTCHA on registration.

Compliance tasks for the agency (not system features)

Placement fee amounts and no-fee categories reviewed against DMW rules by the compliance officer.

Confirmation that e-signatures are accepted for each signed document before esigning goes live.

Accountant confirmation of BIR official receipt or invoice requirements.

9. Reports and dashboards

Report / widget	Shows	Audience

Pipeline	Number of applications in each status, filterable by employer, job order, staff	Management, staff (own pipeline)
Time in stage	Average and longest days per status; bottlenecks	Management
Stuck applications	Applications past their status time limit	Assigned staff, Management
Pending payments	Submitted receipts waiting for verification; overdue payments	Deployment Staff, Finance
Payments and refunds	Verified, rejected, refunded amounts per period; reconciliation list	Finance, Management
Expiring documents	Passports, medical certificates, visas, exit clearances expiring within 30/60/90 days	Documentation Staff
Deployments	Departed and arrived this week/month, by employer	Management, Deployment Staff
Post-deployment	Working, resigned, AWOL, contract ended, by employer	Management
Closed cases	Failed medical, declined, visa denied, cancelled, withdrawn, with reasons	Management

All reports export to Excel/CSV, subject to the user's permissions.

Data import: the existing Google Sheets Masterlist is cleaned and imported, with duplicates matched by passport number, mobile and email.

10. Non-functional requirements

Area	Requirement
Availability	99.5% monthly; maintenance announced in advance
Performance	Applicant pages load in under 3 seconds on a mobile 4G connection

Mobile	Applicant Portal works on low-end Android phones and in Chrome and Safari
Language	English interface, with Filipino helper text where useful
Backup	Daily encrypted backups of database and files to a separate location; 30 daily + 12 monthly kept
Recovery	Restore tested every quarter; data loss at most 24 hours; service restored within 8 hours
Error handling	Friendly error pages; errors logged and reported to the developer automatically
Environments	Separate staging (testing) and production
Maintainability	Source code in the agency's own Git account; documented setup and deployment so another developer can take over
Ownership	Agency owns code, database, storage, domain, hosting and all service accounts and API keys

11. Recruitment CRM (Release 2)

Adds the steps before the medical exam: screening, interviews and matching applicants to job orders. One applicant can have several applications, each tied to one job order with its own status.

Recruitment pipeline (before Release 1 stage 1)

Status	Meaning	Who acts
Registered	Account created, profile started	Applicant / Recruitment Staff
Screening	Profile and basic requirements being checked	Recruitment Staff
Screened	Meets basic requirements	Recruitment Staff

JJHAM Interview	Interview by the agency scheduled or done	Recruitment Staff
Shortlisted	Recommended for job orders	Recruitment Staff
Matched to Job Order	Linked to a specific UAE job order	Recruitment Staff
→ Medical	Hands over to the Release 1 workflow (section 3)	Documentation Staff

Employer interviews, when an employer asks for one, happen during stages 2–3 (documents to employer → offer letter). Additional statuses: On Hold, Withdrawn, Rejected, Employer Rejected, No Show.

Interviews

Fields: applicant, application, type, date and time, interviewer, position, employer, result, rating (1–5), remarks, recommendation, follow-up date, attachments. Types: Initial Screening, JJHAM Interview, Employer Interview, Final Interview, Reinterview.

Results: Passed, Failed, Pending, Re-interview, No Show.

Reminders to the applicant 24 hours before (email and SMS); interviewer sees a daily schedule.

Employers and job orders

Employer: company name, emirate, address, contact person, email, phone, WhatsApp, accreditation details, contract details, status.

Job order: number, employer, position, quantity, salary, contract duration, working hours, benefits, qualifications, experience, required documents (checklist template), fee rule, accommodation, food, date received, expiry, status.

Vacancy counts (Required, Selected, Remaining) update automatically as applications reach Offer Signed.

Alerts when a job order is near expiry or fully filled.

Data import: existing Google Forms/Sheets data is cleaned and imported; applicants are matched by passport number, mobile and email to avoid duplicates.

12. Agents and commissions (Release 2)

Tracks who referred and who handles each applicant, and calculates commissions from deployments.

Agents and teams

Agent record: name, agent code, team, employee link (if staff), contact, status, date started.

Each applicant records Referred By, Assigned Agent, Team and Date Assigned; reassignments are logged.

Agents see **only their assigned applicants** and only the fields they need (no passport or medical files).

Agent metrics

Metric	Definition
Total applicants	Applicants assigned in the period
Qualified / interviewed / selected	Applicants reaching Screened, JJHAM Interview, Offer Signed
Deployed	Applicants reaching Arrived
Rejected / withdrawn	Closed applications
Deployment rate	Deployed ÷ total applicants
Commission earned	Approved commissions in the period

Commission flow

1. Applicant referred by or assigned to an agent.
2. Applicant selected (offer signed) and deployed.
3. Eligibility checked automatically against the commission rule (*suggested:* worker has arrived and stays employed for a set number of days).
4. Management approves.
5. Approved commission goes to the next payroll run (section 15).

Commission rules are admin-managed: amount or percentage, eligibility condition, and clawback if the worker returns early.

Compliance: confirm with the DMW compliance officer how referrers and agents may operate and be paid, since only licensed agencies and their authorized staff may recruit.

13. Employee portal (Release 3)

A self-service area for JJHAM's own staff, inside the staff panel. Each employee sees only their own HR and payroll information.

Page	What the employee sees or does
My profile	Personal and contact details, emergency contact, government numbers (SSS, PhilHealth, Pag-IBIG, TIN) masked
Attendance	Clock in/out, own daily log, monthly summary
Leave	File leave, see balances and request status
Payslips	View and download own payslips
Salary, bonuses, commission	Own history and status
Performance	Own evaluations and goals
Company documents	Handbook, policies, memos (read and acknowledge)
Assigned assets	Laptop, phone and other items issued to them
Announcements	Company news from Management

Employee record (HR/Admin): employee ID, name, position, department, supervisor, employment type and status, date hired, salary grade, government numbers (encrypted), bank details (encrypted), emergency contact, documents (contract, IDs, clearances).

14. Attendance and leave (Release 3)

Attendance

Clock in/out from the staff panel, recording date, time, IP address and device.

Suggested: allow clock-in only from the office network, with an exception list for field staff.

Daily status: Present, Late, Undertime, Absent, On leave, Holiday, Rest day.

HR/Admin sees lateness, absences, undertime and overtime, with monthly summaries per employee and department.

Corrections (missed clock-out) are requested by the employee, approved by the supervisor, and logged.

Leave

1. Employee files leave (type, dates, reason, attachment if needed).
2. Supervisor approves or rejects with a remark.
3. HR/Admin records it; the balance updates automatically.

Leave types and yearly credits are admin-managed (e.g., vacation, sick, service incentive leave, maternity, paternity, solo parent). Statutory entitlements should be confirmed with the accountant or HR adviser.

Holiday calendar maintained by HR/Admin each year.

Notifications: supervisor on new request; employee on decision.

15. Payroll, commissions and bonuses (Release 4)

Payroll pulls from attendance, leave, approved commissions and bonuses so HR does not re-encode them.

Payroll run

1. HR/Admin opens a payroll period (e.g., semi-monthly).
2. The system computes basic pay, overtime, holiday pay, allowances, approved commissions and bonuses, minus absences, lates, government contributions, withholding tax, loans and other deductions.
3. HR/Admin reviews and adjusts with remarks.
4. Management approves; the period is locked.
5. Payslips are published to the employee portal; a bank/payout file and summary report are exported for Finance.

Contribution and tax tables (SSS, PhilHealth, Pag-IBIG, BIR withholding) are adminmaintained and must be checked with the accountant whenever rates change.

13th month pay computed at year end.

Locked periods cannot be edited; corrections go into the next period as adjustments.

Bonuses: employee, reason, amount, date, approver, payroll period, payment status.

Commissions: come from section 12 once approved; shown on the payslip as a separate line.

16. Inventory, assets and purchasing (Release 5)

Inventory (supplies and consumables): item, category, unit, quantity on hand, reorder level, location, supplier. Every stock in and out is a stock movement with date, quantity, user and reason. Low-stock alerts go to Inventory/Purchasing.

Fixed assets: asset ID, type (laptop, desktop, printer, phone, CCTV, furniture, air conditioner, other), brand and model, serial number, purchase date and cost, supplier, warranty end, location, assigned employee, condition, status (In use, In storage, Under repair, Disposed). Issuance and return are recorded, and appear on the employee's Assigned assets page.

Purchasing flow

Step	Who	Result
Request	Any staff	Purchase request with items, reason, estimated cost
Approval	Supervisor / Management (by amount)	Approved or rejected with remark
Purchasing	Inventory/Purchasing	Supplier chosen, quotation attached
Purchase order	Inventory/Purchasing	PO issued to supplier
Received	Inventory/Purchasing	Delivery checked against PO
Inventory updated	System	Stock or asset records created; payable sent to Finance

Suppliers: name, contact, address, TIN, payment terms, status.

17. Finance — management accounting (Release 6)

Gives Management a monthly view of money in and out. It does not replace the BIRregistered books; the accountant keeps those, using exports from this module.

Area	Records	Fed automatically from
Income	Placement fees, service fees, other income; date, source, receipt/invoice no.	Verified payments (section 5)

Expenses	Salaries, rent, utilities, advertising, transportation, supplies, government fees, professional fees, other; with receipts attached	Payroll (section 15), purchase orders (section 16)
Receivables	Amounts owed to JJHAM (e.g., placement fee balances, employer fees), due dates, aging	Payment ledgers
Payables	Amounts JJHAM owes (suppliers, refunds), due dates, aging	Purchase orders, approved refunds
Refunds	Amount, reason, approver, date paid	Closed applications (section 5)

Reports: monthly income and expenses by category, cash in vs cash out, receivables and payables aging, collections per job order and employer, payroll cost per month. All export to Excel for the accountant.

Controls: Finance enters and edits; Management approves expenses above a set amount; closed months are locked; every change is in the audit log.

18. OFW welfare and case management (Release 7)

After arrival, the same person record becomes an **Active Overseas Worker** (worker ID added; no duplicate record). Welfare Staff monitor wellbeing and handle problems.

Welfare checks

Schedule (*suggested*, admin-adjustable): 7 days after arrival, 30 days, then every 3 months until contract end.

Each check records: date, channel (call, WhatsApp, Viber, visit), contact status (reached / not reached), salary received on time, accommodation, working conditions, relationship with employer, problems raised, assistance needed, next check date.

Three missed contacts in a row raise an alert to Welfare Staff and Management. Workers can also report a concern from the Applicant Portal.

Cases

Categories: salary, employer, accommodation, contract, medical, safety, emergency, other.

Fields: worker, category, priority (Low, Medium, High, Emergency), description, reported by, date, assigned staff, actions taken, attachments, outcome.

Workflow: Open → Assigned → Investigating → Action Taken → Resolved → Closed. Every step is logged.

Emergency cases notify Management immediately (in-app, email, SMS) and show contact details for the MWO and OWWA in the UAE.

AWOL reports (section 4.6) open a linked case automatically.

Privacy: welfare and medical case notes are visible only to Welfare Staff and Management.

19. Contract monitoring and renewal (Release 7)

Tracked item	Alerts
Contract end date and time remaining	90, 60 and 30 days before
UAE visa / residence expiry	90, 60 and 30 days before
Passport expiry	180 and 90 days before

At each alert, Welfare or Recruitment Staff record the intended action: Renewal, Rehire (new application for the same person), Return home, or Other.

Rehire starts a new application linked to the same person, keeping full history.

Contract ended and Repatriated workers stay in the database for rehire, subject to the retention rule (section 8).

20. Executive dashboard, search and reports (Release 8)

One Management view across all modules, built from data the other modules already record.

Area	Key figures
Recruitment	Applicants, active applications, interviews this week, selected, in processing, ready to deploy, conversion by stage

Deployment	Deployed this month, active workers, welfare checks due, open cases by priority, contracts expiring in 90 days, AWOL count
HR	Employees, present today, on leave, absent, overtime hours
Finance	Collections, expenses, payroll cost, receivables, payables, refunds
Inventory	Low-stock items, open purchase requests, assets assigned
Agents	Deployments and commissions per agent and team

Global search: Applicant ID, Worker ID, last 4 of passport, name, mobile, WhatsApp, job order and employer. Results respect each user's permissions.

Reports: recruitment, deployment, welfare, HR, payroll, finance and inventory reports, filterable by date, employer, job order, team and staff; export to Excel/CSV; scheduled monthly reports emailed to Management (*suggested*).

21. Technical architecture

One Laravel application on a single VPS in Singapore, MySQL 8, files in a private S3compatible bucket, managed with Laravel Forge or Ploi. This comfortably handles a few thousand applicants a year and 10–30 staff.

21.1 Database

MySQL 8 (relational): the data is linked (applicant → application → documents, payments, signatures, history) and needs transactions and strict relationships. PostgreSQL is an equal alternative.

Table	Purpose
users, roles, permissions	Staff accounts and access
applicants	Person record; passport number encrypted plus a searchable hash
employers, job_orders	Employers and their job orders, each with a checklist template and fee settings

applications	One applicant's case for one job order; current status
status_history	Every status change (append-only)
document_types, documents, document_versions	Checklist, files, versions, verification
medical_results	Result, source, validity, verification
employer_responses	Channel, sender, date, evidence file
e_signatures	Signing evidence and signed-file fingerprint
fee_settings, payment_channels	Admin settings, change-logged
payments, receipts, refunds	Amounts, receipts, verification, receipt/invoice numbers
visas, exit_clearances	Visa, RFP, OEC / OFW Pass
flights	Ticket and flight details
employment_status_log	Post-deployment status and AWOL case records
notifications, audit_logs	Messages and the activity log

Tables added in later releases: interviews, interview_results, agents, teams, commission_rules, commissions (Release 2); employees, departments, attendance, attendance_corrections, leave_types, leave_requests, leave_balances, holidays (Release 3); payroll_periods, payroll_items, payslips, bonuses, contribution_tables (Release 4); inventory_items, stock_movements, assets, asset_assignments, purchase_requests, purchase_orders, suppliers (Release 5); income, expenses, receivables, payables (Release 6); workers, contracts, welfare_checks, worker_cases, case_actions, contract_alerts (Release 7). All link back to the same person and user records.

Indexes cover status and date (for dashboards and escalation), passport hash, mobile, email, receipt reference number and image fingerprint (duplicate detection). Records are soft-deleted; documents, signatures, payments and history are never hard-deleted while retention applies.

21.2 File storage

Private bucket (DigitalOcean Spaces Singapore, AWS S3 Singapore or Cloudflare R2), never public.

Encrypted at rest; random file names with no personal data in paths.

Downloads only through the app, with a permission check, an access log entry and a 5minute link.

Uploads scanned with ClamAV before they become available.

Signed PDFs stored write-once with their fingerprint in the database.

Expected size: about 5–15 MB per applicant, so 10–30 GB per 2,000 applicants.

21.3 Hosting

Production: VPS with 2 vCPU, 4 GB RAM, 80 GB SSD; Ubuntu 24.04 LTS, Nginx, PHP 8.3+, MySQL 8, Redis, queue worker, ClamAV, Let's Encrypt SSL.

Staging: small separate VPS (1 vCPU, 2 GB).

Region: Singapore — low latency to Manila and acceptable to the UAE. Philippine law does not generally require local hosting, but cross-border transfer must be covered in the privacy notice and provider contract; confirm with the DPO.

Scale up when CPU stays above 70% or staff numbers grow: 4 vCPU / 8 GB first, then a managed database.

21.4 Operations

HTTPS only, firewall (ports 80/443; SSH by key from office IPs), automatic security updates, Cloudflare in front.

Nightly encrypted backups of database and files to a second provider; quarterly restore test.

Uptime monitoring every minute; error tracking (Sentry or Flare).

Deployment: Git → automated tests → staging → approval → production. No editing code directly on the server.

21.5 Integrations

Email: Amazon SES, Postmark, Mailgun or Brevo, on the agency domain with SPF, DKIM and DMARC.

SMS: Philippine provider (e.g., Semaphore or Movider).

E-signature: built into the system (section 4.5); a paid service such as DocuSign or Dropbox Sign only if counsel requires stronger proof.

Payments: manual receipt verification; a payment gateway is deferred (section 24).

21.6 Running cost (approximate, at ₱58 = US$1)

Item	Starter / month	Scaled / month

Production VPS	₱1,400	₱2,800–5,600
Managed database	— (on VPS)	₱900–3,500
Staging VPS	₱350–700	₱700
Forge / Ploi	₱550–700	₱700–1,100
File storage	₱290	₱290–600
Off-site backups	₱100–300	₱300–600
Email	₱0–600	₱600–1,200
SMS (≈ ₱0.50–1.00 each)	₱500–1,500	₱1,500–4,000
Monitoring	₱0	₱0–1,500
Domain + Cloudflare	₱100	₱100
Total per month	**≈ ₱3,300–5,600**	**≈ ₱8,000–19,000**
Total per year	**≈ ₱40,000–67,000**	**≈ ₱96,000–228,000**

Not included: development labour, paid e-signature service, gateway fees. Prices are from memory; verify before buying.

22. Technology stack

Decision: Laravel with **Filament for the staff back-office**, and the **Applicant Portal in Blade + Livewire** inside the same Laravel app, with its own login.

- **Why Filament for staff:** an ERP is mostly staff forms, tables, filters and dashboards (recruitment, HR, inventory, finance), which Filament builds quickly, with ready-made role and permission tools.
- **Why not Filament for applicants:** Filament looks like an admin tool. Applicants need a simple, guided, mobile-first screen. Blade + Livewire shares the same data, rules and security, with full control of the design.
- **Custom work needed:** e-signature flow and PDF stamping, status rules (state machine), secure file access logging, and receipt duplicate detection.
- **Main risks:** status rules scattered across screens instead of one state machine; reliance on abandoned or paid plugins; major Filament upgrades needing rework.

Need	Package

Roles and permissions	spatie/laravel-permission, Filament Shield
Staff 2FA	Filament built-in multi-factor authentication or laravel/fortify
Activity log	spatie/laravel-activitylog + Filament log viewer
Status workflow	spatie/laravel-model-states
Files	spatie/laravel-medialibrary + Filament plugin; S3 driver
Malware scan	ClamAV + Laravel validator package
Signature capture	signature_pad (JavaScript)
Stamp existing PDFs	setasign/fpdi with TCPDF
Generate PDFs	spatie/laravel-pdf or barryvdh/laravel-dompdf
Queues	Redis + Laravel Horizon
Need	Package
Notifications	Laravel notifications; custom SMS channel
Backups	spatie/laravel-backup
Monitoring	Sentry or Flare; Laravel Pulse
Import / export	Filament import/export or maatwebsite/excel

Confirm each package supports the chosen Laravel and Filament versions before starting.

To confirm before later releases

Question	Ask	Release
How may referrers and agents operate and be paid?	DMW compliance officer	2
Statutory leave entitlements and holiday rules	Accountant / HR adviser	3
Current SSS, PhilHealth, Pag-IBIG and withholding tax tables; 13th month rules	Accountant	4

Expense approval limits and month-end closing process	Management / accountant	6
Required reporting of welfare cases and repatriations to MWO / OWWA	DMW compliance officer	7

Deferred features (decide later)

Feature	Benefit	Cost / effort
Clinic login	Clinic posts results directly; one less handoff	About 1 week
Payment gateway (GCash, Maya, cards)	Automatic payment confirmation; no manual receipt checks	About 1–2 weeks; ≈ 2–3.5% per transaction
WhatsApp/Viber notifications	Reach deployed workers in the UAE	About 1 week; permessage fees
Filipino version of the Applicant Portal (planned for a later phase)	Easier for some applicants	About 1 week plus translation
